# Sharing Documents, Forms, Folders, and other information with Adaptive Telehealth

Securely share documents, the schedule, messages, images, homework & forms with clients, staff, and referral sources.

1

With Adaptive Telehealth, you share to/from clients, staff, colleagues, and referral sources in a HIPAA-secure manner, and track what is shared and received.

2

Users are able to upload documents that can be securely shared or stored on the system.

3

Documents are only viewable by those with whom the document or information is shared.

4

Depending on the company's needs, our team can turn on/off function that permits the user to share documents, therapy notes, treatment plans, referral forms, forms, and homework with another user of their choosing.

Not sure where to begin?

We are always here for you. If you have any questions, our support team is happy to talk.
